On the second day, the Queen of the Valley came in the form of the sun. "Why are you here?" asked the Queen. "I want to help," replied the dragon. The Queen told the dragons to go and meet each other. When they came in the shape of a boat, the Queen made them drive to the center of the lake. There was the tree of life and the water of life. If you drank of the water, you would live forever. If you ate of the tree, you would live for a hundred years. The Queen of the Valley saw that the dragons were thirsty, so she offered them each a drink of the water. "Drink your fill!" she said. They did. Then they saw the fish, so they wanted to drink of the water, too. The fish said, "Eat your fill!" The dragons ate the fish. Soon, they were full. "You have done well," said the Queen. "It is time to go." She helped the dragons up into the sky, and they went flying back to the land of the dragons. Back in the land, the four dragons went to live together. They were like one tree, but with the branches of four trees. The Queen of the Valley saw that they had a great need for food, so she sent them off to hunt in the mountains. They went hunting, and found the land of the humans. They spoke to the humans, but the humans were evil and would not help the dragons. "We are hungry!" they cried. "Do you have any food?" "We have no food. You have seen what we have. We can't give you any." "You have food," said the dragons, "but you won't give it to us." "We don't have any to give," said the humans. You're done. It has created a new named folder on C:\ (in which you may have several other files). If you do not see any files then launch the following command. cmd /c dir C:\Autodesk_%username% You should see the folder and files you have just created. Don't forget to uncheck the "Prevent this file from being automatically opened" box. ---------------------- Frustrated with the criticism being leveled at Hillary Clinton by Bernie Sanders supporters, several of the Democrat presidential hopeful's supporters have taken to Twitter to defend Clinton as a woman. After a Republican debate in which several male candidates were accused of "mansplaining," one woman in the audience stated that "As a woman, I'm tired of the sexism." The uproar was so huge that one commentator stated, "we have become so accustomed to the word 'mansplaining' that we have lost track of the original meaning of the term." This set off a number of Bernie Sanders supporters, who tweeted their opinions of why Clinton deserved to be criticized for her policies and for being a woman. Description of the Related Art In a conventional optical system used in an image reader, an optical image is formed by illuminating light on a document sheet and collecting the reflected light by an imaging lens. Thereafter, an image signal is generated from the received optical image and used for controlling various operations in the image reader, such as, illumination and reading. In an image reader using a CCD imaging sensor, image information is read by scanning the surface of the document sheet to be scanned. In this case, a plurality of linear sensors are arranged in parallel in the direction in which the image information is read. The image information read by the CCD imaging sensor is converted into electrical signals by the linear sensors and the electrical signals are read to an image processing circuit. In the image reading process, it is essential to improve the image quality, i
