Readme for IEC 61850 Ethernet module (EN100) firmware versions

Deutsche Version ab Seite 9

English Version

IEC 61850 – Ethernet module firmware 4.29 (released 30.08.2016)

This Ethernet module firmware version can be used for the electrical and optical Ethernet module. This firmware version replaces version 4.27 for the optical and electrical Ethernet module. Functionally it's fully compatible with former version 4.x. For the update over the Ethernet interface the file [IEC61850_81_04.29.01.pck](#) must be loaded into the Ethernet module via the Ethernet interface. This file is provided over the Internet for download.

Bugfixes and small improvements:

- Prevention of disclosure of sensitive device information under certain conditions. See the security advisory SSA-630413 under the following website for details:
<https://www.siemens.com/cert/en/cert-security-advisories.htm>
- Minor improvements for IEC61850 Ed2 conformance test according to TPCL1.2(Ed2)
- Minor improvement for the correct cyclical MMS reporting intervals when more than 1 ReportControlBlock is used with integrity period.
- Improvement for the EN100 firmware upload over the front interface in some SIPROTEC devices (e.g. 7SJ61, 7SJ62, 7UT612)
- Improvement of RSTP reconfiguration time for edge devices when RSTP cost style is set 200001, now with the same performance as previously with value 200000.

IEC 61850 – Ethernet module firmware 4.27 (released 13.05.2016)

This Ethernet module firmware version can be used for the electrical and optical Ethernet module. This firmware version replaces version 4.26 for the optical and electrical Ethernet module. Functionally it's fully compatible with former version 4.x. For the update over the Ethernet interface the file [IEC61850_81_04.27.00.pck](#) must be loaded into the Ethernet module via the Ethernet interface. This file is provided over the Internet for download.

Bugfixes and small improvements:

- Minor improvements required for the IEC61850 Ed1 conformance testing.
- Minor improvements on the display of EN100 webpage.
- Interface status of EN100-O (with SFP module) and EN100-O+ can be displayed correctly about the optical status(weak, normal or --).
- Improvement of stability when PDU size is smaller than minimal size of buffered or unbuffered report.
- Prevention of disclosure of sensitive device information under certain conditions. See the security advisory SSA-547990 under the following website for details:
<https://www.siemens.com/cert/en/cert-security-advisories.htm>

IEC 61850 – Ethernet module firmware 4.26 (released 12.10.2015)

This Ethernet module firmware version can be used for the electrical and optical Ethernet module. This firmware version replaces version 4.25 for the optical and electrical Ethernet module. Functionally it's fully compatible with former version 4.x. For the update over the Ethernet interface the file [IEC61850_81_04.26.0.pck](#) must be loaded into the Ethernet module via the Ethernet interface. This file is provided over the Internet for download.

Bugfixes and small improvements:

- Improvement of reconfiguration performance in case of mixed RSTP rings with SIPROTEC 5 devices. If EN100 and SIPROTEC 5 devices are used together in one
