Applications and Add-ons AutoCAD and AutoCAD LT have a number of applications and add-ons, which are proprietary applications that add functionality to the software package. The software suite also includes an application called DWG Workshop, which is provided with the software bundle and allows drawing to be displayed on a standalone monitor.

AutoCAD originally came with the DWG 2000 utility, which would automatically convert and display drawings created in the older DWG format. The DWG2000 utility was discontinued in 2007, and the following year Autodesk announced the release of AutoCAD LT for the Mac, which included DWG2KX, a rewrite of the DWG2000 utility. Autodesk later added DWG2KX to the 2010 release of AutoCAD LT for Windows. In 2011, Autodesk added DWG2KX to the AutoCAD LT for Mac application. However, the original DWG2000 utility remained only for the Windows version of the product until 2018, when Autodesk released a free conversion utility called AutoCAD DWG2000 to DWGX, a free format conversion utility. AutoCAD DWG2000 to DWGX does not work with older drawings, however. In 2016, Autodesk released a free PDF creation tool called Acrobat Pro Extended, which includes a DWGX to PDF converter. Help AutoCAD offers an active help system that can be accessed via the software, which is by default stored in the registry under the following key: HKEY\_LOCAL\_MACHINE\SOFTWARE\AutoCAD This help system allows the user to access a large number of topics. The software includes a Help index, which has a number of topic indexes including: Actions The actions to perform using certain tools Adjustments The adjustments available to be made to drawings, including color adjustments, linetype adjustments and so on Annotations Additional information about tool-tip information and other annotations Blocks The Blocks reference Drafting Related topics Color Fonts Imports Layers Moves Organizers Palettes Printing Relations Rulers Undo Tools Used in AutoCAD Other topics Scripts See also Autodesk DWG List of DWG viewers List of AutoLISP functions References External links AutoCAD users a1d647c40b
