DragoDino is a fun and cute rogue-lite platformer. I enjoyed playing through the game and unlocking what content the game has to offer. I also greatly appreciate the split screen cooperative play and Linux support. While this game feels rather difficult at first, it starts to feel too easy (especially for the rogue-lite genre) as you get more experienced. I would purchase a sequel to this title if it had some improvements. Most notably, some things I think would greatly enhance this game include: a. More powerups, b. More levels (ie. harder levels), c. More bosses, d. More comprehensive unlock system, e. An easier difficulty "casual" to play with friends who are not veterans of the rogue-lite genre.. This game is a joy to play through. It has that mix of cute characters, as well as a rewarding difficulty that makes me come back for more. I would recommend this for people who are into platformers. ^^.

This is a fun and polished (coop) rougelite platformer, and I have no idea why it is sitting at just 5 Steam reviews.

Edit: it's also really challenging later on. Beware!. This is a fun and polished (coop) rougelite platformer, and I have no idea why it is sitting at just 5 Steam reviews.
