Network Event Viewer 8.0.0.67 Description by the Software Developer: "Network Event Viewer 2007 is a network wide event log monitoring, consolidation and management tool enabling Systems Administrators to view and manage event logs from multiple servers and devices. It provides a central location for viewing and managing event logs, and includes features such as log consolidation, log rotation, and log archiving. It also includes a web-based interface for viewing and managing event logs." ca8d075f12
