The Arc'teryx Gamma LT takes our top softshell spot for putting it all together: solid performance, quality materials, and a great fit.. A softshell coat is very useful as the outer level because it offers both insulation and protection against the wind and gentle rain.. Arc'teryx Gamma LT Hiking in cool and windy weather is no enjoyment unless you put on appropriate clothing which continues you comfortable and snug.. The durable outer fabric can withstand a day of backcountry skiing, but the Gamma LT also breathes really well and allows enough air in and out to keep you cool while on the go.. 2 oz What we like: Arc'teryx fit, quality, and all-around performance What we don't: Long sleeves don't fit well with some gloves.. Their breathable and stretchy fabrics offer fantastic performance and a really comfortable fit that moves with you, and as long as you don't take them out in a rain storm, their durable shells can withstand light wind and precipitation.. You'll be hard-pressed to find a more versatile shell for a wide range of outdoor activities.. com!
